

Help minimise your down-time, maximise safety and energy efficiency plus help reduce costs.

Leading power supply designer and manufacturer Powerstax, has teamed up with Rectifier / Transformer specialist Drake Power Systems to provide you with a professional, technical One-stop-Shop for Maintenance, Calibration and Safety Inspection Services together with Preventive Maintenance Plans, Repair, Refurbishment and Replacement options for a wide range of large (500V, 10,000A, 1MW) industrial rectifier applications.

On-site Repair, Refurbishment & Rectifier Maintenance

To help minimise your down-time, a team of UK based service engineers are available for a prompt response to maintain **on-site** power supply equipment from a wide range of manufacturers such as Drake Power, Westinghouse & Brentford Electric.

Maximise service availability, safety and promote energy efficiency with "**Preventive Maintenance Plans**" tailored to your needs.

Calibration: Prevent costly "out-of-spec" errors with regular meter calibration. As part of a comprehensive service we offer on-site meter calibrations & certification to NAMAS standards, complete with full certification.

Site Survey & Plant Recommendations: from a team of UK based service engineers available for a prompt response. Helping you to safely maintain your power supplies and assist in minimising production down-time.

Rectifier - New Installation and Modification

Overseeing Delivery, Installation, Commissioning and After Sales Service of new rectifiers from 10W to 30MW. Offering a full range of bespoke solutions, we can also carry out swiftly and conveniently, the modification of existing units.

Typical Power Supply Applications

- Electrochemical and Plating
- Electrowinning
- Water Treatment
- Electrochlorination
- Cathodic Protection & Anti-Fouling
- Electrophoretic Processes
- Laboratory
- Aircraft Ground Support
- Frequency Converters
- Marine & Offshore
- Industrial
- Telecoms
